Dear Ms. Robbie:

RE: **Clean Step**

This is in reference to your email of April 22, 2015 wherein you provided information on the subject product which you are seeking its acceptability to be used as a cleaner and sanitizer in food processing establishments.

Based on the information provided, we can advise that we see no reason to object to the use of the subject product as proposed in food processing plants provided that:

- a) There is no contamination of food as a result of its use; and
- b) All equipment or surfaces subject to direct contact with food are thoroughly rinsed with potable water after treatment with the product.

Please be advised that our comments above are based on the assumption that the balance of the product's formulation is water.

We trust that the foregoing will be of use to you.

Yours truly,

Amina Badar
